

**Dynamic regeneration**

**Increase above 30% effect**

Core material has been certified by NSF

- Professional manufacturer for residential softener
- Exported to 26 countries all over the world
- Initiative automatic shower softener in domestic

## Soft water shower, better skin care

Human beings are shaped by the land around them. Women from south of China benefit a lot from the soft water. Their skin are softer and more smooth in general. We wash face and take showers everyday and water would be the most important cleanser. If uses water with too much alkali, the alkaline water will remain on our skin and block our pores. It obstructs metabolism and recycle of your skin and lead it to be scaly and dim.

However, soft water with little calcium and magnesium have better dissolubility and activity. It can clean your skin thoroughly and make it breathe freely when you are showering. It will make your skin smooth, soft and can anti-wrinkle to some degree. Therefore, shower softener would be a must-have equipment in beauty salon.

# Advantages

Patented product

NEW

LED screen displays the status and the used days of the shower softener

One button for starting regeneration

Button for setting parameters

Floor-standing type(single tank)/  
Wall-mounted type(single tank)

## Water treatment capacity and salt consumption:

For example: If the local water hardness is 200mg/L, for a three-member family, everyone need to consume average 40L water for bathing every time, the softened water volume after one regeneration cycle is enough for this family to use for 6 days. A pack of 10kg regeneration salt can let resin regenerate 25 times which means the shower softener can provide the softened water for bathing for 150 days.

Inlet / outlet	Temperature	Resin volume	Salt consumption	Rated flow rate
G1/2	5°C~70°C	2.5L	400g/once	300L/h

Water treatment capacity (inlet water hardness is 200mg/L)	Size (L × W × H)
750L	166mm × 167mm × 600mm

## SHOWER SOFTENER

### Dynamic regeneration

Increase above 30% effect

- Save salt and water
- Without brine tank
- Wall-mounted type/  
Floor-standing type
- Small volume

**Application:** mainly used for shower, also can be used in the place such as floor heating, wall-type stove, coffee machine, beauty salon, laundry etc.

- Various installation ways: it can be installed before or after water heater
- Automatically-controlled regeneration time, press one button for regeneration, LED shows the present status.

- Electric part is waterproof
- Serving days can be set, making it clear to know the remaining time before next regeneration
- Automatic backwash function: lessen the situation of resin hardened and strainers blocked, increase the lifetime of resin
- Adopt quick connecting, make it convenient for maintenance
