

TECHNICAL INFORMATION

Stop contaminating water and damaging your filter collectors with **ZEOMEDIA Support Gravel**.

Silica gravel is placed under the collectors, where it accumulates dirt, and where it may not be easily cleaned through backwashing.

Additionally, its heavy weight makes installation difficult and the filters' collectors may be damaged during the process.

ZEOMEDIA Support Gravel:

- 💧 60% lighter than silica gravel.
- 💧 Simpler and more comfortable installation.
- 💧 Prevents damage to filter manifolds.
- 💧 Chemically pre-washed which guarantees that it does not add fines or contaminants to the water.

PARAMETER	UNIT
Specific weight	2.1 g/cm ³
Volumetric weight	1520 - 1585 lb 690 - 720 kg
Effective Mesh Range	4 - 6 4.76 - 3.76 mm
Uniformity Coefficient	1.7
% of Disaggregated Material	3%
Clinoptilolite	80%
Clay	3%
Bed High	12 pg 0.30m
Max pressure	50 psi

User guide

Fill the tank halfway with water, and then simply add **Zeomedia Support Gravel** to cover the collectors.
